

CUTANEOUS ONCOLOGY PROGRAM

THE UNIVERSITY OF ARIZONA
CANCER CENTER

- A National Cancer Institute-designated comprehensive cancer center
- Offers exceptional care to patients with a wide variety of skin cancers
- “One stop” comprehensive, multidisciplinary clinical care from nationally known experts in skin cancer

The Cutaneous Oncology Program

The Cutaneous Oncology Program (COP) at The University of Arizona Cancer Center offers exceptional care to patients with a wide variety of skin cancers

- Team members work closely with referring physicians to create a plan of care and follow-up treatment for patients
- The COP also serves as a referral center for the management of malignant melanomas, a wide variety of non-melanoma skin cancers and cutaneous lymphomas.
- Weekly melanoma and other cutaneous malignancy case review conferences for review of pathology and treatment planning across all disciplines

Dermatology Oncology

The Dermatology/Oncology section of the COP provides:

- Mole Mapping for patients at risk for melanoma, particularly those with multiple moles or atypical nevi
- Complete skin cancer screening and skin cancer treatment
- Clinical trials and research for skin cancer and atypical moles

Medical Oncology

The Medical Oncology section of the COP provides:

- Management of melanoma and other high-risk cutaneous malignancies at all stages
- Traditional and cutting edge experimental treatment for locally advanced and metastatic disease
- Extensive experience with biologic therapy, biochemotherapy and vaccines in treating melanomas

Surgical Oncology

The Surgical Oncology section of the COP provides:

- Surgical treatment of primary, recurrent and metastatic high risk skin cancer, in particular melanoma and squamous cell carcinoma
- Use of sentinel lymph node biopsy and dissection for complete management of patient's melanoma

Radiation Oncology

The Radiation Oncology section of the COP provides:

- State-of-the-art radiation therapy tailored to individual patient needs
- Axxent Electronic Brachytherapy System by Xofig[™] for the treatment of non-melanoma skin cancers

CUTANEOUS ONCOLOGY PROGRAM

Behavioral Science,
Genetic Counseling
and Health
Education

▶ **The Behavioral Science, Genetic Counseling and Health Education section of the COP provides:**

- Trained health educators offering complete skin cancer education including information on prevention and detection
- Social workers on site for assistance with patient's medical, social and psychological needs
- Support groups for certain skin cancers
- Genetic counselor for education on genetic cancer syndromes, genetic counseling and testing
