The Flinn Foundation Buffmire Lecture, begun in 1997, continues the Flinn Foundation’s commitment to bringing to Arizona leading practitioners and thinkers in the medical field.

Dr. Lawrence J. Brandt, MD, Professor of Surgery and Medicine in Gastroenterology and Liver Diseases at Montefiore Medical Center in New York, will discuss the intestinal microbiome as it relates to fecal transplantation and give examples of how the microbiome can be changed to alter the outcome of patients suffering from a variety of illnesses including C. difficile infection, irritable bowel syndrome and inflammatory bowel disease.

**The Discovery and Use of Fecal Transplantation to Cure Diseases**

**Noon | Friday, March 23**

DuVal Auditorium, Banner – University Medical Center Tucson

Lunch is provided for all guests.
Lunch service begins at 11:40 AM.
